Compensation Claim of [REDACTED]

25X1A

1. The subject claim is presented for payment under the authority of [REDACTED] and, since it is acceptable from a medical standpoint, there is no legal objection to your approval.

2. It is noted that the employee is a member of the Government Employees Health Association. However, such coverage does not extend to disability benefits which are normally acceptable under the standards of the Federal Employees Compensation Act. This claim is not being submitted through normal channels because of security considerations, but since it is otherwise acceptable no claim for reimbursement should be made under the Government Employees Health Association coverage, and, consequently, the full amount can be met by this Agency.

3. Although the C.A. 4 form indicates that compensation is claimed for loss of pay, actually this is only for medical expenses and services.

4. If you so approve, the claim may be presented to the proper Certifying Officer for payment.
